Professional Experience

Student Researcher (Front-End Developer) | *George Brown College, Toronto* Oct 2025 – Present

- Engineered a real-time geospatial dashboard for ThinkWirelessSolutions using Next.js, React, and TypeScript, integrating ArcGIS Maps SDK to map live GeoJSON data across Toronto and optimize winter maintenance fleet routing.
- Migrated the Whole Women Network platform from a legacy WordPress build to a custom Next.js application, developing an administrative dashboard to manage users and financial "susu" circles while achieving a perfect 100 Lighthouse score and reducing LCP from 2.3s to 0.5s.
- Implemented 40+ unit and 15+ integration tests using Vitest to validate critical user flows, successfully minimizing manual QA testing time during the pre-production phase.

Freelance Full-Stack Developer | *GoodCodeClub, Toronto* Jan 2026 – Apr 2026

- Built full-stack features for a caregiver marketplace, designing the PostgreSQL database schemas and Next.js API routes to manage data flow, while constructing the responsive client interface using React and Tailwind CSS.
- Developed an asynchronous messaging system from end-to-end, constructing the relational database schema, implementing Server-Sent Events for real-time communication, and building the React client interface.

Website Developer Intern | *Hand Eye Society, Toronto* Jan 2026 – Apr 2026

- Spearheaded the revamp of the organization's WordPress site, focusing on information architecture and role-based access control to improve the overall editor experience.
- Diagnosed critical WordPress performance bottlenecks by configuring an SMTP server relay, resolving a severe 30s response time, and boosting overall Lighthouse performance from 69 to 91.

Production Support Manager | *OpenText, Waterloo* Dec 2021 – Mar 2024

- Directed a team of 12 technical support agents, consistently surpassing SLAs and maintaining a 95% CSAT score; designed training modules that reduced onboarding time by 25%.
- Collaborated with Product and Engineering to execute operational enhancements, leveraging customer feedback to drive product improvements and resolve complex escalations.
- Reduced onboarding time by 25% by designing a comprehensive training program for 30+ off-site new hires

Product Support Specialist | *OpenText, Waterloo* Sept 2020 – Dec 2021

- Troubleshoot and resolved complex SaaS escalations, reproducing software defects in staging environments and authoring technical documentation to assist the engineering team with successful deployments.

Service Desk Specialist | *University of Waterloo, Waterloo* May 2018 – May 2020

- Resolved 50+ daily technical issues across multiple operating systems, achieving a 95% first-call resolution rate and authoring documentation that increased self-service by 15%.

Education

George Brown College – Postgraduate Certificate in Web Development	April 2026
University of Waterloo – BSc in Honours Science	April 2020

Skills

Technical: JavaScript, TypeScript, HTML, CSS, SQL, React, Next.js, Node.js, Express.js, Tailwind CSS, Vitest, WordPress
